SAUNDERS, NOVEMBER 31, 1891

THE PEOPLE'S PARTY

All reports from the national meeting of the Farmer's Alliance indicate that the People's party adherents are in a large majority. The adoption of a resolution declaring for the People's party may cause some loss in the south, but upon the whole the order will gain by it.

There is no job in the new party. It is not the invention of politicians. It did not originate with a self-seeking lot of professional politicians. It originated with the people—the working classes, in the interest of all but the favored few.

It is not expected that the Republican party can do so. His career for the past twenty-five years, for the most part, the Democratic party can do so if it will and with entire consistency, but we do not expect it. This, however, is expected by the members of the Southern Alliance and the People's Alliance members of that section hesitate at a third party movement until they have made a last and final appeal to the Democratic party. If they fail it will be the most serious setback of the People's party, if they succeed the People's party will dissolve and heartily unite with the Democrats.

It is not the office that are wanted; the office of the Democratic party, if only the party will give the people a true Jeffersonian, Jacksonian, public policy and lead the nation back to a people's government, wherein equal rights will prevail, wherein special privileges will be banished, wherein manhood and brains will rank higher than gold and mediocrity.

EX-SENATOR PALMER of this state refers to the squabbling electoral law with these remarks: "I do not see any way out of the new law in Michigan, in reference to the election of presidential electors, can be set aside, unless there is something in the law in which the courts can declare it unconstitutional. It is perfectly constitutional for the legislature to prescribe the mode of electing electors. That is what they have done in this law. I have been unable to discover any means of getting the matter into the courts before the election of next year takes place and that is one of the difficulties in the way."

GRAND RAPIDS heartily wishes Detroit success in her great effort to secure the sitting of the national convention of the political parties next year. For the comfort of delegates Detroit offers inducement superior to any city of its size in the union. Those who attended the Grand Alliance convention at Detroit can and will entertain an immense throng of people with royal magnificence. The exact process that will certainly produce rain may not be known but it is sure that progress has been made in that direction and that assurance is now given by experiments that progress causing or hastening rain will soon be known as one of the remarkable reliable and useful discoveries of this age.

The reelection of Colonel Polk president of the Alliance was a wise conclusion. He has proven capable and upright. He is earnest for the cause. His experience will be of value next year when wisdom and experience will be more than needed than ever.

The Farmers' Alliance and the Farmers' Mutual benefit association endorsed the People's party movement at their national meetings at Indianapolis Wednesday, and the widest acclaim was given. Now let the work be pushed in every school district.

Those people who are not getting good light from low test oil, or who imagine the poor oil is charring the wick and giving off smoke, should try cleaning the lamp burner, especially taking care to clear the air holes in the bottom of the burner.

SHOULD Blaine be nominated by the Republicans next year and Boies of Iowa be his Democratic opponent the election would be a repetition of 1884, and Blaine would meet the fate of Clay.

Facts for Taxpayers to Ponder Over. State Democrats. The Republican papers scoff at the various little economies that have taken place since the Democratic party got control of this state. With their broad contempt for all public or official economy, they do not care to see that to keep close watch on the little leaks is the surest evidence of thrift.

To discharge superfluous employees is retrenchment. The following showing from X. X. X., who is in a position to know, will prove interesting to our readers. I find upon comparing the treasurer's reports for the fiscal year beginning July 1, 1890, and ending June 30, 1890, the following statement:

Cash on hand last report, \$1,116,189 19. Receipts for the year, \$2,677,238 82. Total, \$3,793,428 01. Expenditures, \$3,842,168 03. Cash on hand June 30, 1890, \$1,151,269 78. For the year ending June 1, 1890, and ending June 30, 1891:

Cash on hand, \$1,351,269 78. Receipts, \$1,909,398 99. Total, \$3,260,668 77. Expenditures, \$1,909,398 99. Cash on hand June 30, 1891, \$1,291,269 78. The year 1890-91 is under Republican rule and a year in which the legislature did not sit in session, and the report of 1890-91 is comparative year; while the cry sounds from Republican papers that this administration is reckless and extravagant, let us see whether this is true or not.

The receipts for 1890-91 were \$3,777,238 82, the receipts for 1891-92 were \$3,828,238 82. A difference in favor of 1890-91 of \$51,000 00. Expenditures for the years 1890-91, \$3,842,168 03. Expenditures for the years 1891-92, \$1,909,398 99. Cash on hand July 31, 1890, \$1,151,269 78. Balance in favor of 1891, \$73,884 54. This shows that in the years 1890 and 1891 the receipts were \$1,000,000 00 greater than in the years 1891, also that the receipts for the year 1891-92 were \$234,700 00 more than in 1890-91. And \$234,700 00 withstanding all this the cash account at the end of the fiscal year for 1891 was \$73,884 54 more than in 1890-91. Now where is the robbery or extravagant legislation? Do you take the \$234,700 00 and add to that the \$73,884 54 cash on hand more than was the year before? It shows you that they have saved to the working people of this state a sum of \$307,628 30 this year, and that is what the legislature passed in session. Can you find any extravagance about this? X.
