It is not a citizen, can be a citizen, and ought not to be a citizen, it does not follow by any means that it is a slave. On the contrary, it is a citizen, it does not follow that the negro, as an inferior race, ought to possess every right, every privilege, every advantage that can be conferred by the exercise of consistent virtue, the safety of the society in which he lives. (That's so, and cheerily.)

Follow-citizens, here you find men hurrying for Lincoln and saying that he did right, when in one part of the State he stood up for negro equality, and in another part for the political effect, discarded the doctrine and declared that there always must be a superior and inferior race. (That's not men. Put them out, etc.) Abolitionists up north are expected and invited to vote for Lincoln because he goes for the equality of the race, holding that he is the Declaration of Independence, the white man and the negro were created equal and equal as they cannot so be, while they are not.

Down south he makes this "quibble" about the race and that race and the other race before he defers the creed party and declares that the negro can never be elevated to the position of the white man. You find that his political meetings are called by different names in different counties in the State. Here they are called Republican meetings, but when Lincoln made a speech last Thursday at Grand Rapids at a meeting, but a "grand rally of Lincoln men."

My friends, I have not time to say to you in perfect good humor, but in all sincerity, that no political creed is sound which cannot be proclaimed fearlessly in every State of this Union where the Federal Constitution is not the supreme law of the land. (That's so, and cheerily.)

I should like to know, if taking this old Declaration of Independence, which declares that all men are equal upon principle, and making exceptions to it, where will I stop? If one man says it does not mean a negro, why may not another man say it does not mean another man? It is the Declaration that we have made that get the statute book in which we find it, and we will stand up for it, as to do it, if it is not true, let us tear it out!

My friends, I have not time to say to you in perfect good humor, but in all sincerity, that no political creed is sound which cannot be proclaimed fearlessly in every State of this Union where the Federal Constitution is not the supreme law of the land. (That's so, and cheerily.)

you willing, now that we have become the strongest, under that great principle of self-government that allows each State to do as it pleases, and that we are to be a Union of institutions? (No, no.) Then, my friends, I say to you that there is but one path of progress in this Republic, and that is to submit this government to our fathers made it, divided to free and slave States, allowing each State to do as it pleases, and that is to submit this to free and slave States, allowing each State to do as it pleases.

THE ELECTIONS. THURSDAY MORNING, OCT. 14. Important elections were held in Pennsylvania, Indiana and Ohio, on Tuesday.

In Pennsylvania the result is disastrous to the Democracy. Philadelphia city has gone over to the Union. The republicans will probably carry the State.

In Ohio, Pendleton, Democrat, Gov. general, Vallandigham, (over Lew. Campbell) Democrat, are elected. The republicans gain one or two Congresses in this State.

In Indiana, three Democrats, as far as heard from, have been elected to Congress—Hovey, English, and Allen.

THURSDAY EVENING. The latest returns indicate a Republican gain in Pennsylvania. J. Glancy Jones, Democrat, is reported defeated in the Berks District.

INDIANA—Davis, Democrat, is elected to Congress in the 7th District. The returns indicate the election of the entire Republican ticket, and a majority of Republican members of the Legislature.

MISSOURI. In the election for members of the Kansas Legislature, Leavenworth county gave the Republican ticket an average majority of 200.

AN EXPOSE. WHO STOLE THE SUGKERS? THE MICHIGAN STATE AGRICULTURAL COLLEGE.

The Michigan Farmer, for October, is doing a good work in exposing the rottenness of the State Farm at Lansing. In that journal will be found the report of the President of the State Agricultural College, made to the Board of Education on the first of April last, and which is about to be published in a separate volume of the Report of the Superintendent of Public Instruction. Accompanying this report are detailed statements of the expenses which are divided into several heads, but not carried out. We cannot present these accounts in full, but we have taken pains to separate the amounts paid under each head, and thus present in a more condensed form a summary of the various items of expense. These are as follows:

Table with 2 columns: Item description and Amount. Includes items like 'Services and salaries of members of Board of Education', 'Expenses for labor and fuel for stock', 'Boarding House expenses', etc.

It will thus be seen that the whole amount paid by the State for the year 1885, which is the date of the first warrant, was \$10,107.38. Of this amount it will be seen that expenditures marked 2, 3, 6, 7, 14, 15, are all connected with the construction of the buildings.

The remainder, with the exception of \$20,000 paid out for the fitting up of the buildings, and stock necessary to set the institution into working order.

To account for the expenditure of the \$82,731.92, which has been paid on the 13th of May of the College since its opening on the 13th of May.

Table with 2 columns: Item description and Amount. Includes items like 'Salaries', 'Boarding House expenses', 'Fuel', 'Transportation', etc.

Of this it will be seen that the College has used up better than one-half, and amongst this is a large sum paid out for re-roofing and re-constructing the interior of the College building, which was originally constructed, that it was not fit for the uses to which it was to be applied, nor for any other purpose.

The set to establish the Agricultural College was passed on the 12th of February, and provided that the process of twenty-two sections of land were to be sold for \$50,000 to be paid from the Treasury to meet the expenses necessary to be incurred.

At the next session of the Legislature, in February 1887, another act supplementary was passed, appropriating \$40,000 more to be used in the construction of buildings, purchase of apparatus, payment of teachers and other expenses.

Besides this, there has been paid into this institution by the students for board, and from some other minor matters, \$2,127.28 up to the first of last April. The whole sum amounting to \$38,447.28.

House, also had been built without any adequate arrangement for cooking, and it was deficient throughout its interior construction. The expenses which ought to have been provided for in an adequate arrangement have all been taken out of the above account by the Legislature for its support, and for the construction of dwelling houses for the professors. In summing up the expenses, therefore, taking the items from this report, which is decidedly deficient in clearness of detail, and in that only arrangement of the accounts, the documents remain, we find them to be as follows:

Table with 2 columns: Item description and Amount. Includes items like 'Expenses for labor and fuel for stock', 'Boarding House expenses', 'Fuel', etc.

This shows that on the first of April last the institution had expended all its means, and \$538,210 over.

A TRIP FROM HOME.

Kalamazoo, Oct. 1885. My Dear Brother:—With a fine line of thought, I have just returned from a trip to the State Farm at Lansing. The plants have been washed off by the rains, and curled up, by the sun, till they are equal, for jolting purposes, to a tangle of wild weeds.

My first visit was to the women's department of the building. It consisted of a separate yard of its own inside the main yard, and is arranged in a large airy separate building, the roof of which is made of iron plates, and is covered with a layer of earth, and is supported by a series of pillars.

My second visit was to the men's department of the building. It consisted of a separate yard of its own inside the main yard, and is arranged in a large airy separate building, the roof of which is made of iron plates, and is covered with a layer of earth.

HENRY SPRING WILL SELL FOR A FEW DAYS, EMBROIDERIES, ONE HALF THE USUAL PRICES!

The first place visited was the dining hall, a large room, furnished in a simple, neat, and comfortable style, fitted up with long, narrow tables with seats on one side, so arranged that when the guests are seated, they all face one way.

My third visit was to the men's department of the building. It consisted of a separate yard of its own inside the main yard, and is arranged in a large airy separate building, the roof of which is made of iron plates, and is covered with a layer of earth.

My fourth visit was to the women's department of the building. It consisted of a separate yard of its own inside the main yard, and is arranged in a large airy separate building, the roof of which is made of iron plates, and is covered with a layer of earth.

My fifth visit was to the men's department of the building. It consisted of a separate yard of its own inside the main yard, and is arranged in a large airy separate building, the roof of which is made of iron plates, and is covered with a layer of earth.
